Team 404 · International students building for the next ones to arrive

Muhammet Yalkapov · Sulaymon Sadullo

Hub71+ AI Hackathon supported by OpenAI · Abu Dhabi, 2 October 2026

For an international student, the difficulty begins before the flight

Before departure

A review of international student challenges names accurate information, the admission procedure, and visa documents as the common pre-departure difficulties.

Orientation comes late

In the one UAE study found (six focus groups, 40 first-year students, ten nationalities), most participants wanted the information in the first week or before they arrived.

The stakes

A 2024 meta-analysis found a pooled correlation of $r = 0.39$ between acculturative stress and psychological outcomes ($r = 0.41$ with depression).

Yuki, 18, from Japan (a fictional example)

Admitted to Abu Dhabi University on a university-sponsored visa. Intermediate English. Arrives in three weeks. The steps Yuki needs sit with the university, federal portals, and Abu Dhabi services, and a new student meets them in pieces.

Honest limit

The UAE evidence is one qualitative study at a single institution. No quantitative UAE study of arrival burden was found.

We have lived this problem, and we answer these questions at work

Arrived as a student

Muhammet came to Abu Dhabi as an international student at Abu Dhabi University.

Works with new arrivals

He works in ADU's International Students Recruitment Office, where new students bring their questions.

Leads a student community

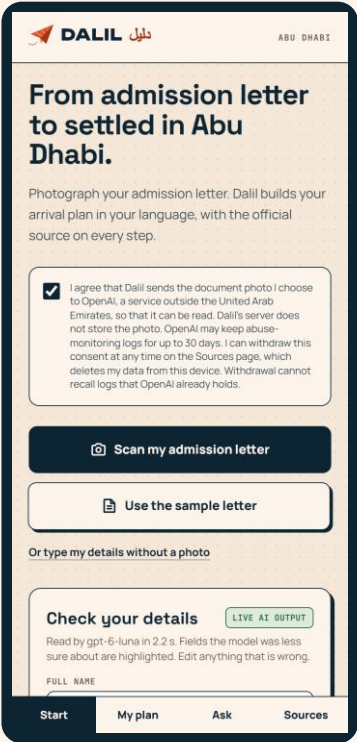

He is Founding President of the CIS Students Club at ADU.

59.6%

of ADU's student body were international students, from over 100 nationalities, which ranked the university 14th worldwide for proportion of international students (announcement of 6 June 2023).

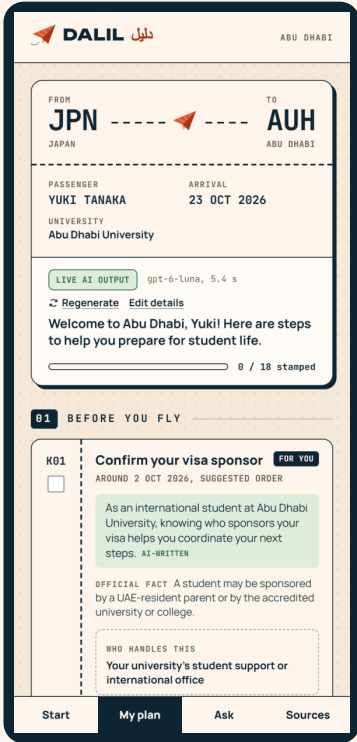

Team 404: Muhammet Yalkapov and Sulaymon Sadullo, international students building for the next ones to arrive.

One photo of the admission letter becomes a plan in which every step shows its official source

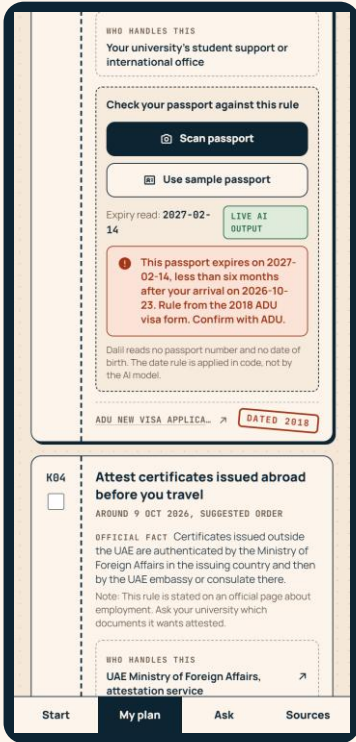

1. Scan the letter

Vision fills the form. The student confirms every field.

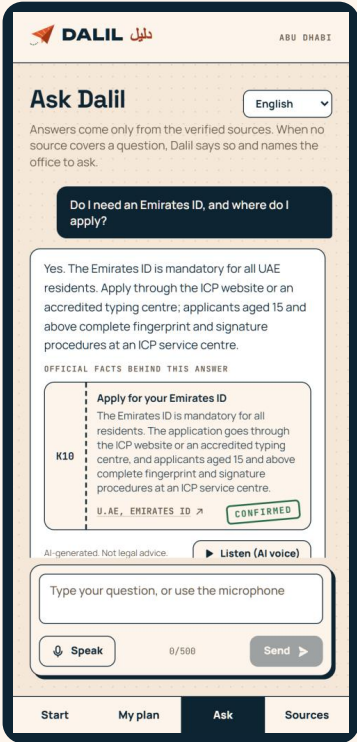

2. Get the plan

A boarding pass and 19 stamped tickets, each with a personal note.

3. Check the passport

The model reads the date. The rule runs in code.

4. Ask a question

Cited answers, and labeled general guidance.

Then: handoff

Each step names the body that completes it and links to it:

university office, ICP, UAE Pass, MoHRE, MoFA, and TAMM.

Dates are labeled "suggested order" unless the source contains a deadline.

Live demonstration on the deployed product

dalil-abudhabi.vercel.app

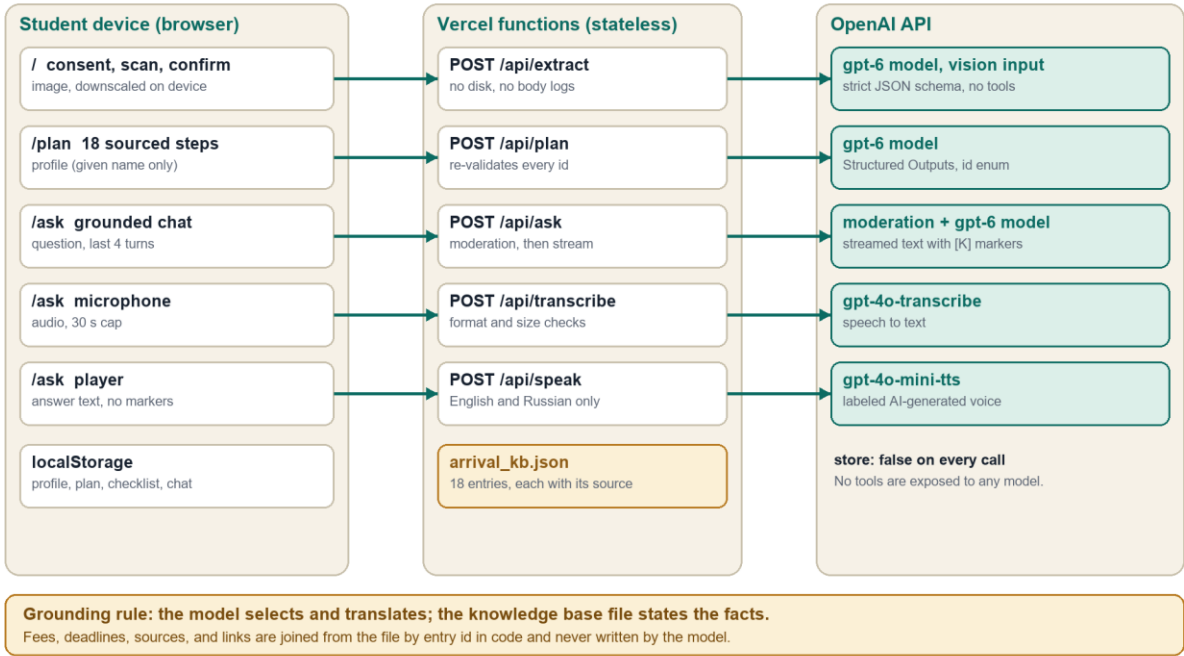

Open it on your phone while we present. No login, no install.

Tick the consent box, tap "Use the sample letter", and create the plan.

Scan to open Dalil

The model selects and explains, and the facts come from a verified file

Feature	Model and method	Guardrail
Letter and passport reading	gpt-6-luna, image input, Structured Outputs	Student confirms every field; no passport number or date of birth extracted; date rule in code
Personal plan	gpt-6-luna, Structured Outputs	Selection from 19 entry IDs only
Questions in the student's language	omni-moderation-latest, then gpt-6-luna, streamed	Verified entries first; anything else is labeled as general guidance
Voice	gpt-4o-transcribe and gpt-4o-mini-tts	Editable transcript; "AI-generated voice" label

Tested today

Thirteen live probes pass on production: both sample documents read correctly, a hidden instruction was flagged and ignored, answers cite their sources, and the voice round trip works.

The university sponsors the visa, so the university is the channel to the student

Arrive

The UAE government portal states that a student may be sponsored by the accredited university and must submit a certificate stating the duration of study. For a student with no parent in the country, the university owns the first step.

Settle in

Dalil covers the stretch from the admission letter to the first settled weeks, then hands the student to TAMM, which a case study reports at 3.8 million users and more than 1,150 services. On the TAMM pages we opened, we found no pre-arrival journey for students.

Build a future

The last step of every plan is sourced: a 10-year Golden Visa for graduates of UAE universities classified A or B, with a minimum GPA of 3.5 (class A) or 3.8 (class B), within two years of graduation.

Honest limit

No count of international students in Abu Dhabi, or of newly arriving students, exists in any source we opened, so this slide gives no market size. The one figure we use is ADU's 59.6% international share from June 2023. The pilot is proposed; no university has agreed.

What is real today, what is sample data, and what we ask for

Real today

Document reading, plan generation, grounded answers, voice, and 19 sourced entries. Deployed and open.

Sample data today

The buddy card and the two synthetic documents. The persona is fictional.

Next

1. Confirm current procedures and fees with the university.
2. Pilot with one international office for one intake.
3. Real buddy matching through student clubs.
4. Move to OpenAI's UAE data residency option.

Our ask

An introduction to the TAMM team, or to the international office of a second Abu Dhabi university, so that Dalil's handoff into government services is confirmed with the service owner.

Dalil is the on-ramp to TAMM for international students.
